

ABIM JOSHI

Software Engineer · Flutter · iOS (SwiftUI) · Android (Jetpack Compose)
abimjoshi7@gmail.com · +977-9860920006 · Shankhamul-31, Kathmandu · [LinkedIn](#) · [GitHub](#) · [Portfolio](#)

PROFESSIONAL SUMMARY

Software Engineer with 6+ years shipping production-grade Android (Jetpack Compose), Flutter, iOS (SwiftUI) and React Native apps across fintech, ed-tech, ERP, and commercial domains; specializing in Clean Architecture, offline-first design, and AI-integrated application experiences.

TECHNICAL SKILLS

Languages: Bash, Dart, Kotlin, Java, Rust, SQL, Swift, TS	DevOps & Tools: Fastlane, FFmpeg, Figma, GitHub Actions, Postman, Shorebird, Xcode
Frameworks: Axum, Flutter, Jetpack Compose, Next.js, Springboot, SwiftUI,	Methodology: Agile, TDD, Clean Architecture, SOLID, CI/CD

PROFESSIONAL EXPERIENCE

Flutter Developer · Shrig Solutions

Aug 2024 – Present · Bishalnagar, Kathmandu

- Engineered **Flytechy (Android) & Fishtechy (iOS)** — AI-powered fishing apps using computer vision to auto-measure fish dimensions from photos; features include competition leaderboards, verified catch logging, and community sharing with ethical catch-and-release promotion.
- Developed **Aquabuildr** (iOS & Android), an AI-driven aquarium management app with 600+ species compatibility engine, real-time water parameter tracking, maintenance scheduling, and integrated AI chat support for fish care advice.
- Engineered **background media upload/download service** (WorkManager on Android, BGTaskScheduler on iOS) with resumable transfers, retry logic, and progress notifications; integrated **FFmpeg-powered in-app video editing** via native platform channels — enabling catch video trimming, compression, format conversion, and thumbnail extraction with real-time progress feedback; implemented **real-time chat** with WebSocket featuring delivery/read receipts, media sharing, offline message queuing, and push notification alerts.

Flutter Developer · Raindrop Inc.

Oct 2023 – Aug 2024 · Pepsicola, Kathmandu

- Led development of a **cross-platform ERP application** covering accounts payable/receivable, inventory management, HR module, and multi-branch reporting, serving SME clients with complex operational workflows.
- Implemented **real-time financial analytics dashboards** with live KPI tracking and drill-down reporting; engineered **offline-first data synchronization** ensuring uninterrupted access to ledgers, sfm and reports in low-connectivity field environments.
- Integrated **compliance monitoring and audit trail module** ensuring adherence to regulatory standards; reduced compliance incidents and added role-based access control (RBAC) for sensitive financial data across user tiers.

Mobile Developer · Podamibe Nepal

May 2022 – Oct 2023 · Tripureshwor, Kathmandu

- Enhanced **Mero Lagani** — a Nepal NEPSE stock market app featuring live share prices, real-time floor sheet, portfolio tracker, watchlists, price alerts, IPO results, and market analytics; integrated Web-Engage to improve user retention by **15%** through targeted push notifications.
- Developed **Mero School** — a school management platform covering student records, attendance tracking, assignment submission, exam results, fee management, and teacher-parent communication via in-app messaging and push notifications.
- Improved combined app store ratings by **1.3 stars** through continuous feedback-driven iteration, Crashlytics-driven crash resolution, and A/B-tested UX enhancements across both apps.

Software Developer · Incube Technologies Pvt Ltd

Jun 2020 – Apr 2022 · Patan, Kathmandu

- Developed a **multi-vendor e-commerce app** with product catalogue, advanced search and filtering, cart and wishlist management, integrated payment gateway (eSewa / Khalti), and real-time order tracking with push notification updates.
- Built **Mero Health Care** — a healthcare platform featuring doctor discovery, appointment booking, teleconsultation, digital prescriptions, medical history records, and pharmacy-to-door delivery integration.
- Implemented **Clean architecture and SOLID principles** across both apps; resolved production crashes via Sentry and Crashlytics, maintaining crash-free session rate across the user base.

EDUCATION

B.E. – Information Technology

Maharashtra Institute of Technology, Pune, India · 2013 – 2019
